Introduction Little did I know when I started out how easy this would be. I could have heeded the warnings of Lean et al. (1989) or read Clark's paper (1986) but I decided to plunge ahead anyway with the guidance of the stars. If only the phone would stop ringing I could concentrate on making these numbers add up, as predicted by FAO (1993). [Space] 2. Materials and Methods [Space] 3. Results and Discussion [Space] 4.
